WORK EXPERIENCE

Ubiq Education, London

Frontend Web Developer · June 2023 - Present

- Using a bespoke CMS I create unique HTML components which build into beautiful sites for public schools.
- Using designs built in Sketch and directly with the designer, I build HTML structures which can be placed almost anywhere in a page, using the clients own copy and images.

Proagrica, Portsmouth

Frontend Web Developer · September 2018 - March 2023

- I met with Project Managers regularly to discuss requirements for the products being developed, to provide time estimates and technology suggestions.
- I provided continuous communication to meet tight deadlines. I was responsible for ensuring that new site designs are converted to pixel-perfect websites for our clients.
- I was an advocate for using new technologies to speed up development, such as task runners, ES6 and SASS/SCSS.

Abacus E-Media, Portsmouth

Frontend Web Developer · November 2015 - September 2018

- I took responsibility for new clients on their Cloud platform, using detailed style guides in Adobe applications and creating or adapting complex, responsive HTML layouts.
- I worked with backend developers to ensure that new features or modifications are well built. I was also responsible for providing support and give advice regarding the implementation of features for clients.
- I built email templates for clients who wish to use email marketing software and integrate the templates into the software.

Brilens International Ltd, Portsmouth

Web Developer · 2014 - 2015

- I was responsible for the maintenance of a Magento e-commerce system utilising several storefronts.
- Using my skills as web developer I ensured that all content is up-to-date and correct.

EDUCATION

University of Portsmouth

BSc - Web Technologies · September 2013 - July 2015
